

The NEW Avancer Rail Measuring Wheel

Avancer UK Launches a Brand New Rail Measuring Wheel

Made of stainless steel and using a Precision 0.5 m rubber covered measuring wheel for better traction on the rail. Adjustable handle which is telescopic for easy transportation. Designed specifically for the Rail Industry using high quality components the Avancer Rail Wheel is accurate to 0.5% and is fully manufactured in the UK. Available in three models to suite all rail applications

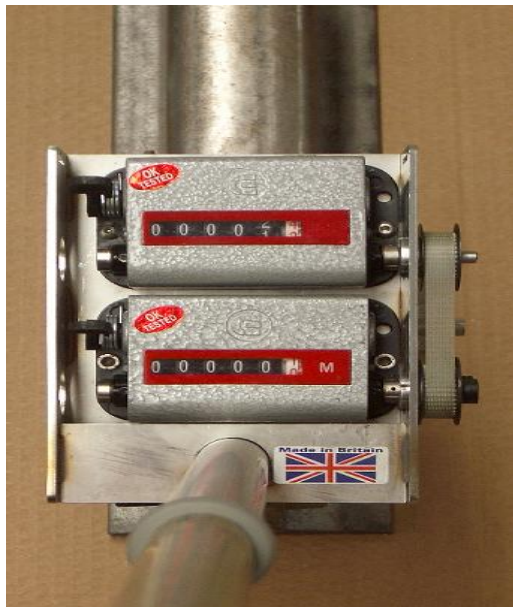

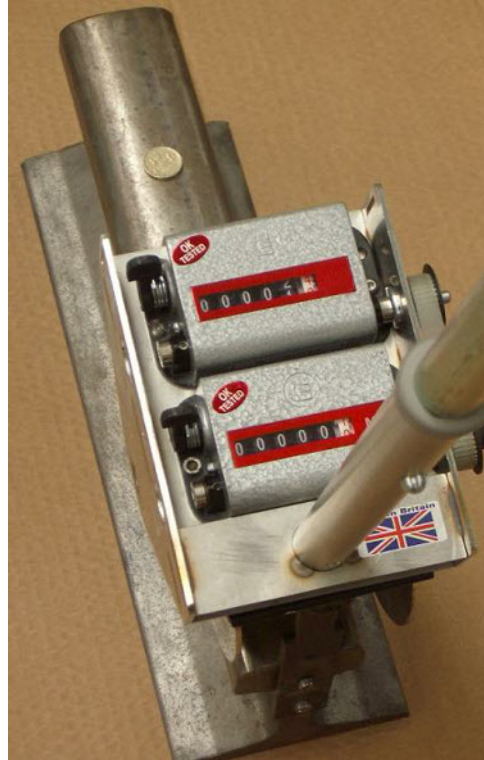

Rail Wheel Preliminary launch document

Fitted with either one or two counters measuring in metric or imperial, it is also available with a declutch which is used to stop the counter measuring when crossing points on the rail track.

The handle is telescopic and folds away for carrying. The units also come complete with a carry bag.

All stainless steel construction and drive mechanism is protected by a stainless steel cover to ensure maximum protection.

Feature	Benefit
Accuracy 99.5%	Reliable measurements in both metric and imperial
Stainless Steel	No rust or weak points in the structure
Adjustable handle	Height adjustment for ergonomic comfort
De Clutch option	Disconnects counter for measuring over railway points
Dual Counter option	Metric and Imperial or metric/metric for trip and total
Carry Bag	Easy to transport and added protection while shipping
Covered Drive Belt	Complete protection of drive mechanism for extra security
